

MantaroBot Controller for Android

Now Available on Google Play!

You can now use your Android Phone or Tablet to drive your MantaroBot by downloading the app from the [Google Play](#). The new controller application is designed as a transparent overlay that allows you to control the MantaroBot while viewing the Audio/Video call on the screen simultaneously. The MantaroBot can be driven using touch controls on the screen or by using the device's accelerometers. A [user guide](#) for the Controller is available on the MantaroBot website with a full description of the Controller's capabilities.
